

## **EastWave<sup>®</sup> Mount Adapter Nikon/M42L**

Used for installation of the M42 screw mounted lenses (Zenitar, Zenit) on Nikon F-mounted cameras. The built-in to the adapter high quality lens allows to get a sharp focus for short shooting distances while maintaining the ability of the focus at infinity. We guarantee the picture good quality. This adapter used with lenses fits for cameras that have manual mode for aperture on the lens and manual focusing.

### Installation:

1. Combine the red dots on the adapter and lens.
2. Turn the adapter clockwise until it clicks.

### Deinstallation:

Push the holding pin and turn against a hour hand.

### Note (for cameras with autofocus):

When working with M42 lenses, focusing may not be emphasized. Expo-modes:

1. P (program) – identic to Av-mode.
2. Tv (exposure priority) – doesn't work.
3. Av (aperture priority) – works normally.
4. M (manual) – exposure and aperture vary, exposure lapse shown by exposure correction.
